

## REACH Compliance Statement

Atos support the objectives of Regulation (EC) No 1907/2006 (REACH) for the **R**egistration, **E**valuation, **A**uthorization and Restriction of **C**hemicals, aimed at improving the protection of human health and the environment.

Atos is not a manufacturer of chemical substances and do not place on the market articles intentionally designed to release substances. Nevertheless, dedicated resources are assigned to ensure compliance with:

- Annex XIV (Authorisation List)
- Annex XVII (Restrictions)
- The Candidate List of Substances of Very High Concern (SVHC).  
The Candidate List was updated by ECHA on 5 November 2025 and now comprises 251 entries of SVHC. (<https://echa.europa.eu/candidate-list-table>)

On this basis, Atos confirm the presence of Lead (CAS 7439-92-1) above the 0.1 % w/w communication threshold in the product families listed below. Lead is commonly found as an alloying element in copper, steel and aluminium components.

- Proportional valves & cartridges
- On-off valves & cartridges
- Safety valves
- Explosion-proof & Stainless steel valves
- Cylinders & Servocylinders
- Hydraulic pumps
- Systems, Manifolds & Accessories

On 12 April 2023 ECHA recommended Lead for inclusion in Annex XIV; we are monitoring the legislative process and will take any further actions required should the substance be formally added to the Authorisation List.

For every article containing an SVHC above 0.1 % w/w we:

- provide recipients with information under Article 33(1) of REACH; and
- submit or update a notification to the SCIP database within six months of the substance's inclusion in the Candidate List, as required by Article 9(1)(i) of the Waste Framework Directive.

Should any of the SVHCs added on 5 November 2025 – or future updates – be identified in our articles above the threshold, we will promptly inform customers, update SCIP notifications and, where feasible, work towards substitution or other appropriate risk-management measures.

For further information on product compliance, please contact our Technical Office.
