

# Stainless steel ex-proof solenoid directional valves

on-off, direct, poppet type leak free - **ATEX, IECEx, EAC, PESO** or **cULus**

## DLAHX, DLAHXS, DLAHM(S), DLAHM(S)

Ex-proof, poppet type, directional solenoid valves made in two different stainless steel executions for corrosive environments and fluids.

- **X** full stainless steel for external and internal parts, to withstand extreme and corrosive environmental conditions, and to ensure full compatibility also with water base and special fluids.
- **XS** stainless steel only for external parts to withstand extreme and corrosive environmental conditions.

Ex-proof stainless steel solenoids are provided with **ATEX, IECEx, EAC, PESO Multicertification** or **cULus** North American certification, see section 8.

DLAHX and DLAHXS are **SIL** compliance with IEC 61508 (TÜV certified)

(1) See section 6 for materials specification.

(2) 6 and 4 versions differ only for the coil power, see power consumption at section 5 and operating limits at section 15.

(3) The "X" valves in full stainless steel execution are factory tested by Atos with mineral oil or pure water in order to avoid the contamination of the end user system. At the end of each valve model code must be specified the type of fluid to be used in the valve's testing: "H" for hydraulic oil or "W" for pure water.

(4) Only for Multicertified valves in full stainless steel "X" execution (not available for valves with UL certification)

Flame resistant with water <b>(2)</b>	NBR low temp.	HFA-E, HFA-S, HFB, HFC	

**(1)** The operating temperature of the fluid must be compatible with the maximum viscosity range allowed for the valve

**(2) Performance limitations in case of flame resistant fluids with water:**

-max operating pressure = 210 bar -max fluid temperature = 50°C

 The ignition temperature of the hydraulic fluid must be 50°C higher than the max solenoid surface temperature

### 11.1 Cable temperature

The cable must be suitable for the working temperature as specified in the "safety instructions" delivered with the first supply of the products.

#### Multicertification

Solenoid code	Max ambient temperature [°C]	Temperature class	Max surface temperature [°C]	Min cable temperature
OA(B)X	45 °C	T6	85 °C	not prescribed
OA(B)XS	70 °C	T4	135 °C	90 °C

	50 °C	T3	200 °C	100 °C
	60 °C	T3	200 °C	120 °C
	70 °C	T3	200 °C	130 °C

#### cULus certification

Solenoid code	Max ambient temperature [°C]	Temperature class	Max surface temperature [°C]	Min cable temperature
OAX/EC	55 °C	T6	85 °C	100 °C
OAXS/EC	70 °C	T5	100 °C	100 °C
OAKX/EC	55 °C	T3	200 °C	115 °C
OAKXS/EC	70 °C	T3	200 °C	140 °C

### 12 CABLE GLANDS - only Multicertification

Cable glands with threaded connections M20x1,5 for standard or armoured cables have to be ordered separately, see tech. table **KX800**

**Note:** a Loctite sealant type 545, should be used on the cable gland entry threads

### 13 OPTIONS

**O** = horizontal cable entrance, to be selected in case of limited vertical space

**R** = the R device operates as a security (not combinable with /V).

When the valve is electrically energized, the manual reset knob must be manually lifted at the same time in order to permit the poppet to move from the rest position to the switched position. The return of the valve to the rest position does not require lifting the manual reset knob.

**V** = with handweel manual override (not combinable with /R)

#### Option /R

Lift to permit the valve switching
