

# Ex-proof proportional reducing valves

direct or piloted, without transducer - **ATEX, IECEx, EAC, PESO** or **cULus**

## RZGA-A, HZGA-A KZGA-A, AGRCZA-A

Ex-proof proportional reducing valves direct or piloted, for open loop pressure controls. They are equipped with ex-proof proportional solenoid, certified for safe operations in hazardous environments with potentially explosive atmosphere.

Certifications:

- Multicertification **ATEX, IECEx, EAC** and **PESO** for gas group **II 2G** and dust category **II 2D**
- Multicertification **ATEX** and **IECEx** for gas group **I M2** (mining)
- **cULus** North American certification for gas group **C&D**

**RZGA, HZGA**, direct or piloted:

Size: **06** - ISO 4401  
 Max flow: **12** and **40** l/min

**KZGA**, piloted:  
 Size: **10** - ISO 4401  
 Max flow: **100** l/min

**AGRCZA**, piloted:  
 Size: **10** and **20** - ISO 5781  
 Max flow: **160** and **300** l/min

Max pressure: **250 bar**

**11 CABLE GLANDS** - only **Multicertification**

Cable glands with threaded connections GK-1/2", 1/2"NPT or M20x1,5 for standard or armored cables have to be ordered separately, see tech. table **KX800**

**Note:** a Loctite sealant type 545, should be used on the cable gland entry threads

**12 OPTIONS**

**O** = Horizontal cable entrance, to be selected in case of limited vertical space.

**P** = Integral mechanical pressure limiter

The AGRCZA-\*/**P** are provided with mechanical pressure limiter acting as protection against overpressure. For safety reasons the factory setting of the mechanical pressure limiter is fully unloaded (min pressure).

At the first commissioning it must be set at a value lightly higher than the max pressure regulated with the proportional control.

For the pressure setting of the mechanical pressure limiter, proceed according to following steps:

- apply the max reference input signal to the valve's driver. The system pressure will not increase until the mechanical pressure limiter remains unloaded.
- turn clockwise the adjustment screw ① until the system pressure will increase up to a stable value corresponding to the pressure setpoint at max reference input signal.
- turn clockwise the adjustment screw ① of additional 1 or 2 turns to ensure that the mechanical pressure limiter remains closed during the proportional valve working.

**R** = Integral check valve for free reverse flow

The AGRCZA-\*/**R** are provided with integral check valve for free reverse flow A→B

- ① Check valve - cracking pressure = 0,5 bar
- ② Plug
