

Stainless steel pressure relief valves

direct, screw-in cartridges

CART-MX(S), CART-AREX(S)

Screw-in, direct operated pressure relief valves used to limit the max pressure in the hydraulic systems or to protect part of the circuit from overpressure.

The cartridge design reduces the dimension of blocks and manifolds, without penalizing the functional characteristics.

They are available in three sizes and in two different stainless steel executions for corrosive environments and fluids.

- X** full stainless steel for external and internal parts, to withstand extreme and corrosive environmental conditions, and to ensure full compatibility also with water base and special fluids.
- XS** stainless steel only for external parts to withstand extreme and corrosive environmental conditions.

Size: **G1/2" ÷ M35**

Max flow: **2,5 ÷ 120 l/min**

Max pressure: up to **420 bar**

Size and stainless steel execution (1): MX-3, MXS-3 = G1/2" MX-6, MXS-6 = M33x1,5 AREX-20, AREXS-20 = M35x1,5							Series number		Seals material , see section [5]: - = NBR low temp. -40°C PE = FKM BBT = FVMQ fluorosilicon -60°C (4)		Test fluid , only for X execution: (3) H = mineral oil W = pure water
Max pressure settings: see hydraulic characteristics in section [4]					R = reduced leakage for special applications only for CART AREX-20 and CART AREXS-20 (2)						

For **PED** safety version see technical table CWY010

- (1) **X** = Full stainless steel
XS = Stainless steel only for external parts

See section [5] for material specification

(2) Code **R** must be always reported in the model code of CART AREX-20 and CART AREXS-20

(3) CART MX and CART AREX in full stainless steel execution are factory tested with mineral oil or pure water in order to avoid the contamination of the end user system. At the end of each valve model code must be specified the type of fluid to be used in the valve's testing: "**H**" for hydraulic oil or "**W**" for pure water.

(4) Only for full stainless steel "**X**" execution

3 GENERAL CHARACTERISTICS

Assembly position / location	Any position
Cavity	See section 8
MTTFd values according to EN ISO 13849	150 years, for further details see technical table P007
Ambient temperature	Standard = -40°C ÷ +70°C /PE option = -20°C ÷ +70°C /BBT option = -60°C ÷ +70°C
Storage temperature range	Standard = -40°C ÷ +80°C /PE option = -20°C ÷ +80°C /BBT option = -60°C ÷ +80°C
Compliance	RoHS Directive 2011/65/EU as last update by 2015/863/EU REACH Regulation (EC) n°1907/2006
