

# Solenoid cartridge valves

screw-in, 2-way, poppet type, leak free

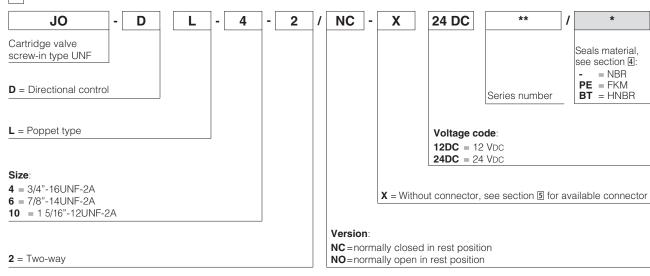

#### JO-DL

Leak free, poppet type solenoid cartridges in screw-in execution normally used to cut off the hydraulic power supply line. They are available in normally closed NC, or normally open NO configurations.

Max flow: **300 l/min** Max pressure: **350 bar**

## 6 INSTALLATION NOTES

- 1) The assembling of cartridges inside manifolds must be done tightening the valve exagonal ring (for tightening torque, see section 10). Excessive values can cause anomalous deformation and poppet sticking.
- 2) The CE certification is valid only with shielded electric cables and connector. Consult also tab. P004.
