

Safety modular valves with spool position monitoring

On-off, direct, conforming to Machine Directive 2006/42/EC - certified by

HF are spool type, direct operated solenoid valves in modular execution, normally used for safety functions to shut-off or to by-pass the hydraulic user lines.
They are provided with **FV** inductive posi-

tion switch for spool position monitoring, CE marked and certified by TÜV in accordance with safety requirements of Machine Directive 2006/42/EC.

The modular execution permits to make compact functional circuits, by the stack mounting with other modular valves and solenoid valves size 06.

Applications

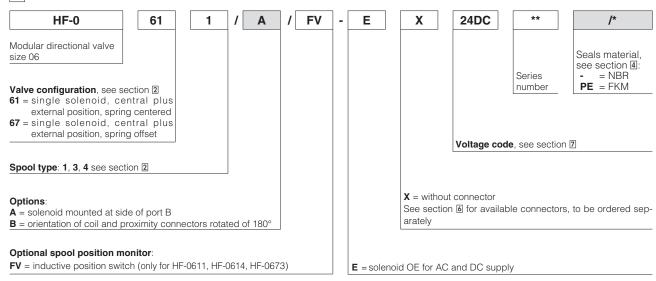

Syncro press brakes, vertical presses, plastic injection, ceramic presses.

Certification

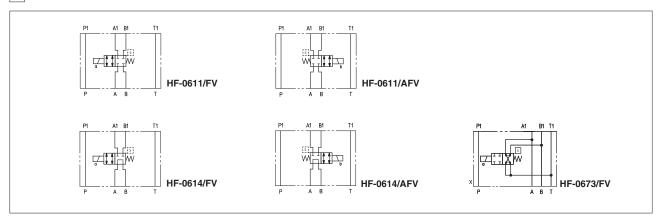

The TÜV certificate can be downloaded from www.atos.com, catalog on line, technical information section.

5 OPTIONS

- **A** = Solenoid mounted at side of port B. In standard versions, solenoid is mounted at side of port A.
- **B** = Orientation of coil and proximity connectors rotated of 180°

the manual operation is not permitted for safety valves, than they are provided with solenoid blind rings to prevent the access to the manual override.

- (1) Coil can be supplied also with 60 Hz of voltage frequency: in this case the performances are reduced by 20 ÷25% and the power consumption is 52 VA.
 (2) Average values based on tests preformed at nominal hydraulic condition and ambient/coil temperature of 20°C.
- When solenoid is energized, the inrush current is approx 3 times the holding current.
