

# **Proportional relief valves**

directed, without transducer

#### SRZME-A, CART SRZME-A

Poppet type direct operated proportional relief valves for pressure open loop controls, available in following executions:

**SRZME**: subplate mounting, ISO size 06 **CART SRZME**: M20 cartridge execution

They operate in association with electronic drivers, see section 2, which supply the proportional valves with proper current to align the valve regulation to the reference signal.

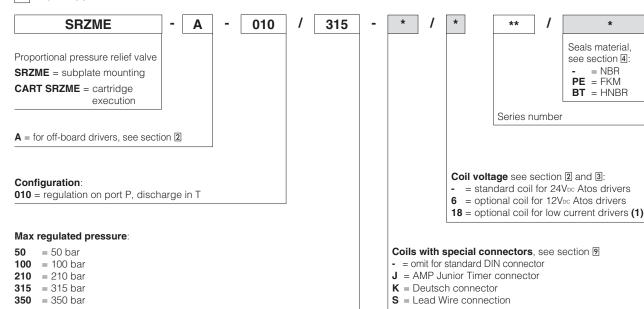

The solenoid coils are available with different nominal resistances depending to the voltage supply to the electronic driver (12 VDC or 24 VDC) and to the driver characteristics, see section 2 and 3.

Mounting surface SRZME: ISO 4401 size 06

Cavity CART SRZME: see section 10

Max flow = 4 l/min Max pressure = 350 bar

Flame resistant without water		FKM	HFDU, HFDR	- ISO 12922		
Flame resistant with water		NBR, HNBR	HFC			

#### 5 GENERAL NOTES

SRZME-A and CART SRZME proportional valves are CE marked according to the applicable Directives (e.g. Immunity/Emission EMC Directive and Low Voltage Directive).

## 6 SOLENOID CONNECTIONS

SOLENOID POWER SUPPLY CONNECTOR TYPE 666				
PIN	Signal description			
1	SUPPLY	25 3		
2	SUPPLY			
3	GND			

<sup>(1)</sup> Average response time values; the pressure variation in consequence of a modification of the reference input signal to the valve is affected by the stiffness of the hydraulic circuit: greater is the stiffness of the circuit, faster is the dynamic response.

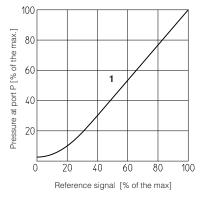

## 7 DIAGRAMS (based on mineral oil ISO VG 46 at 50 °C)

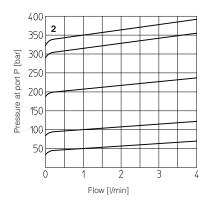

**Note**:The presence of counter pressure at port T can affect the effective pressure regulation.

with reference signal set at Q = 1 l/min

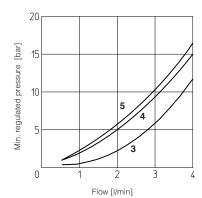

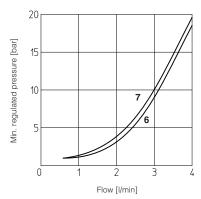

# 3-7 Min. pressure/flow diagrams

with zero reference signal

3 = pressure range: 50
4 = pressure range: 100
5 = pressure range: 210
6 = pressure range: 315
7 = pressure range: 350

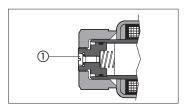

# 8 AIR BLEEDING

At the first valve commissioning the air eventually trapped inside the solenoid must be bled-off through the screw  $\odot$  located at the rear side of the solenoid housing.

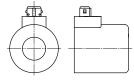

The presence of air may cause pressure instability and vibrations.
