

Ex-proof proportional 2-way cartridges high performance

piloted, with two LVDT transducers - ATEX, IECEx, EAC, CCC

LIQZA-L

Ex-proof digital proportional 2-way cartridges, high performance with two LVDT position transducers (pilot valve and main stage) for best accuracy in not compensated flow regulations.

They are equipped with ex-proof proportional solenoid and LVDT transducers certified for safe operations in hazardous environments with potentially explosive atmosphere.

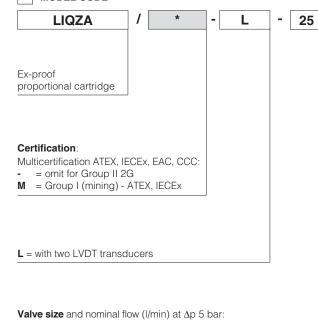

- Multicertification ATEX, IECEx, EAC and CCC for gas group II 2G and dust category II 2D
- Multicertification ATEX and IECEx for gas group I M2 (mining)

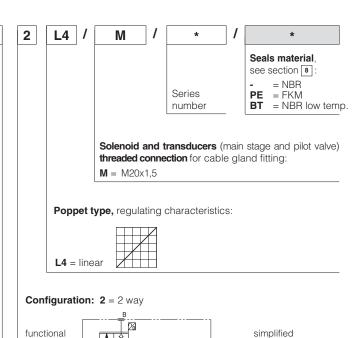

The flameproof enclosure of solenoid and transducers prevent the propagation of accidental internal sparks or fire to the external environment.

They are designed to limit the surface temperature within the classified limits.

Size: $25 \div 100$ - ISO 7368 Max flow: $1200 \div 16000$ I/min Max pressure: 420 bar

Flame resistant with water	(1)	NBR, NBR low temp. HFC				

The ignition temperature of the hydraulic fluid must be 50°C higher than the max solenoid surface temperature

(1) Performance limitations in case of flame resistant fluids with water:

-max operating pressure = 210 bar -max fluid temperature = 50°C

/!\ WARNING

The loss of the pilot pressure causes the undefined position of the main poppet.

The sudden interruption of the power supply during the valve operation causes the immediate shut-off of the main poppet.

This could cause pressure surges in the hydraulic system or high decelerations which may lead to machine damages.

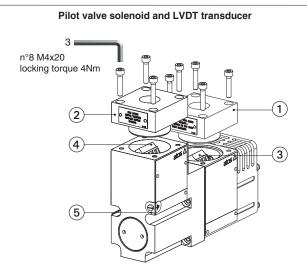

⁽²⁾ With pilot pressure = 140 bar

9 CABLE SPECIFICATION AND TEMPERATURE - Power supply and grounding cables have to comply with following characteristics:

Multicertification Group I and Group II

Power supply: section of coil connection wires = 2,5 mm² **Main LVDT transducer:** section of cable connection wires = 1 mm²

section of internal ground wire = 2,5 mm²

section of external ground wire = 4 mm²

9.1 Cable temperature

The cable must be suitable for the working temperature as specified in the "safety instructions" delivered with the first supply of the products.

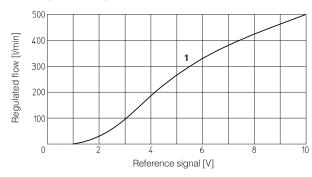

Max ambient temperature	Temperature class		Max surface temperature [°C]		Min. cable temperature [°C]		
[°C]	Goup I	Goup II	Goup I	Goup II	Goup I	Goup II	LVDT main stage

10 CABLE GLANDS

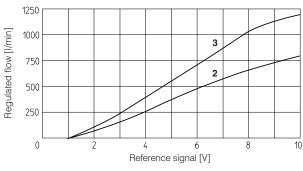

Cable glands with threaded connections M20x1,5 for standard or armoured cables have to be ordered separately, see tech. table **KX800**Note: a Loctite sealant type 545, should be used on the cable gland entry threads

12 AIR BLEEDING

1) Air suction port (SP):

 N° 1 plug G1/4" for sizes 25 to 50 N° 1 plug G1/2" for sizes 63 and 100

To be used only in case port A is connected to tank and subjected to negative pressure, consult our technical office.

2 Air bleeding (MA, MB):

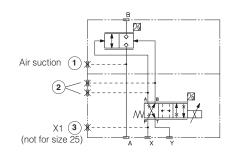

N° 2 plugs G1/4"

At the machine commissioning it is advisable to bleed the air from piloting chambers, by loosening the 2 plugs MA and MB shown in the picture.

Operate the valve for few seconds at low pressure and then lock the plugs.

3 External pilot pressure (X1):

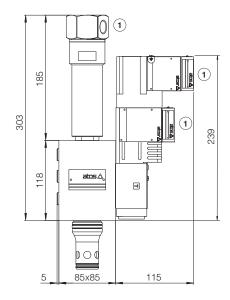

N° 1 plug G1/4" for sizes 32 to 100
