

## Smart Servopump - SSP

high performance P/Q control and energy saving

SSP is available in single pump (sect. 1.1) or double pump execution (sect. 1.2). SSP systems combine the typical advantages of hydraulic power transmission with the ease of control and adjustment of an electric drive while also ensuring maximum levels of energy efficiency.

Maximum flow: **350 l/min**

Maximum rated power: **100 kW**

Maximum continuous pressure:

cast iron pump **330 bar**

aluminium pump **250 bar**

They consist of a fixed displacement internal gear pump, driven by a permanent magnet synchronous servomotor controlled by an electronic drive. The latter controls the speed of the servomotor and therefore of the pump, to adjust the flow rate or pressure of the system based on the reference signals received from the PLC of the machine.

A dedicated algorithm optimizes the P/Q function by automatically selecting the activation of the flow or pressure control.

Compared to traditional systems, SSPs offer the following advantages:

- significant reduction in energy consumption, as the pump operates at the speed strictly necessary to generate the required flow rate / pressure
- high dynamics and precision of P/Q control thanks to a dedicated algorithm
- reduction of the noise level, thanks to the design of the pump and the variable speed
- maximum flexibility thanks to dedicated software
- Smart Maintenance allows to plan in advance the replacement of worn components, maximizing productivity and minimizing maintenance costs
- simplified commissioning thanks to the Smart start-up and Smart tuning functions
- possibility of customization up to 4 axes with Multiple axis function

For more details see technical table AS050

### 1 MODEL CODE

#### 1.1 Single pump execution

For optimal sizing, download the sizing software from MyAtos area at [www.atos.com](http://www.atos.com)

<b>SSP</b>	-	<b>T-SP</b>	-	<b>NP</b>	-	<b>2020L</b>	-	<b>1024</b>	-	<b>046</b>	/	<b>C</b>	/	<b>T</b>	*	/	<b>PE</b>
Smart servopump															Series number		Seals material <b>PE</b> = FKM
<b>Control logic:</b>																	
<b>T-SP</b> = alternated P/Q control with resolver																	

**Fieldbus interface**, serial port always present:

**NP** = Not present

**BC** = CANopen

**EH** = EtherCAT

**BP** = PROFIBUS DP

**EP** = PROFINET RT/IRT

#### Pump

**PGI, cast iron** pump, Pmax 330 bar (1) - see table AS300:

1011 = 10,8 cm <sup>3</sup> /rev	2040 = 39,5 cm <sup>3</sup> /rev	3080 = 80 cm <sup>3</sup> /rev
1016 = 15,6 cm <sup>3</sup> /rev	2050 = 49,5 cm <sup>3</sup> /rev	4080 = 80 cm <sup>3</sup> /rev
2020 = 20 cm <sup>3</sup> /rev	4050 = 50 cm <sup>3</sup> /rev	3100 = 100 cm <sup>3</sup> /rev
2025 = 24,5 cm <sup>3</sup> /rev	3064 = 64 cm <sup>3</sup> /rev	4100 = 100 cm <sup>3</sup> /rev
2032 = 31,6 cm <sup>3</sup> /rev	4064 = 64 cm <sup>3</sup> /rev	

**PGIL, aluminium** pump, Pmax 250 bar - see table AS350:

2020L = 20 cm <sup>3</sup> /rev	2040L = 40,1 cm <sup>3</sup> /rev	3080L = 80 cm <sup>3</sup> /rev
2025L = 24,5 cm <sup>3</sup> /rev	2050L = 50 cm <sup>3</sup> /rev	3100L = 100 cm <sup>3</sup> /rev
2032L = 32,1 cm <sup>3</sup> /rev	3064L = 64 cm <sup>3</sup> /rev	4125L = 125 cm <sup>3</sup> /rev

(1) Pmax depends on the pump displacement

**Hydraulic option** see section **8**:

**C** = integrated block with relief valve and pressure transducer

**D** = as option C plus Smart Cooling functionality

**Electronic function** see section **9**:

**K** = Drive with Safe Torque Off - always present

**Drive** D-MP - see table AS500:

022 = 22 A	060 = 57,5 A	140 = 140 A
032 = 32 A	090 = 87 A	165 = 165 A
046 = 46 A	100 = 100 A	210 = 210 A

**Motor PMM** - see table AS400:

1009 = 8,7 kW	1032 = 30 kW	2080 = 80 kW
1015 = 15 kW	2042 = 42 kW	2100 = 100 kW
1024 = 24 kW	2055 = 55 kW	

## 1.2 Double pump execution

Second pump must be selected with equal or smaller displacement than first pump

Our specialists are available to give support in the sizing of SSP double pump executions

<b>SSP</b>	-	<b>T-SP</b>	-	<b>NP</b>	-	<b>2020</b>	/	<b>1011</b>	-	<b>1024</b>	-	<b>046</b>	/	<b>K</b>	/	<b>T</b>	*	/	<b>PE</b>
Smart servopump																	Series number		Seals material <b>PE</b> = FKM
<b>Control logic:</b>																			
<b>T-SP</b> = alternated P/Q control with resolver																			
<b>Fieldbus interface</b> , serial port always present:																			
<b>NP</b> = Not present																			
<b>BC</b> = CANopen																			
<b>BP</b> = PROFIBUS DP																			
<b>EH</b> = EtherCAT																			
<b>EP</b> = PROFINET RT/IRT																			
<b>First pump</b>																			
<b>PGI, cast iron</b> pump, Pmax 330 bar (1) - see table AS320:																			
1011 = 10,8 cm <sup>3</sup> /rev																			
2025 = 24,5 cm <sup>3</sup> /rev																			
2050 = 49,5 cm <sup>3</sup> /rev																			
1016 = 15,6 cm <sup>3</sup> /rev																			
2032 = 31,6 cm <sup>3</sup> /rev																			
2020 = 20 cm <sup>3</sup> /rev																			
2040 = 39,5 cm <sup>3</sup> /rev																			

## Second pump

**PGI, cast iron** pump, Pmax 330 bar - see table AS320:

1011 = 10,8 cm<sup>3</sup>/rev    1016 = 15,6 cm<sup>3</sup>/rev

(1) Pmax depends on the pump displacement

**Drive** D-MP - see table AS500:

<b>022</b> = 22 A	<b>060</b> = 57,5 A	<b>140</b> = 140 A
<b>032</b> = 32 A	<b>090</b> = 87 A	<b>165</b> = 165 A
<b>046</b> = 46 A	<b>100</b> = 100 A	<b>210</b> = 210 A

**Motor** PMM - see table AS400:

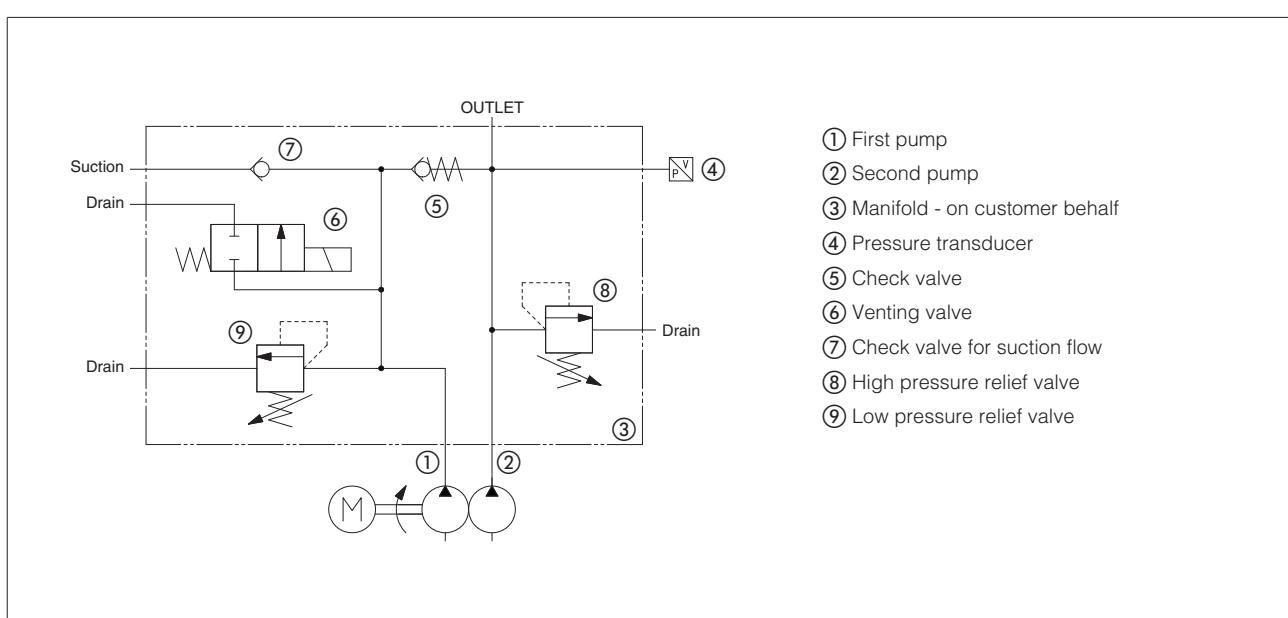

<b>1009</b> = 8,7 kW	<b>1024</b> = 24 kW	<b>2042</b> = 42 kW
<b>1015</b> = 15 kW	<b>1032</b> = 30 kW	<b>2055</b> = 55 kW

## Typical double pump application

The double pump execution is particularly suitable for machine cycles in which phases with high flow rate and low pressure alternate with phases of high pressure and very low flow rate. This configuration allows, in fact, to limit the required shaft torque, reducing the size of the electrical motor and drive. When the machine cycle requires high pressure and low flow rate, the venting valve (6) must be activated.

The suction valve (7) is necessary to allow oil suction from the tank in case SSP revolves in opposite direction when in pressure control phase, while the venting valve is activated.

The image below represents an example of hydraulic scheme for double pump execution. The assembled manifold is on customer behalf.

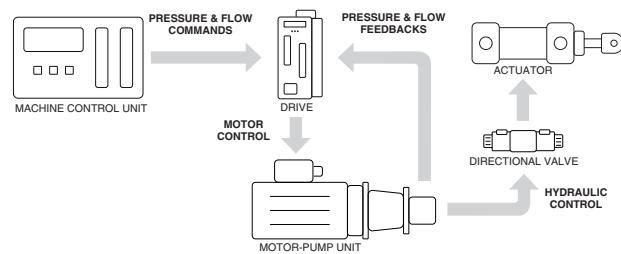

Contact the Atos technical department for more details and support regarding the sizing of the SSP with a double pump execution.

## 2 FUNCTIONING DESCRIPTION

SSP servopumps are designed to efficiently and accurately generate and regulate hydraulic power at every stage of the machine cycle. The ability to modulate the required flow rate or pressure by varying the number of revolutions gives it a substantial advantage in terms of energy savings compared to traditional systems that operate at constant speed. Thanks to the high dynamics and dedicated algorithms, the SSP allow you to directly control the speed of movement and the force of the hydraulic actuators with optimal levels of precision and repeatability.

They consist of an internal gear pump, a permanent magnet servomotor and an electronic drive.

The drive is connected to an angular transducer which measures the rotation speed of the servomotor and to a pressure transducer. It manages the motor power supply, the operating logic and system diagnostics.

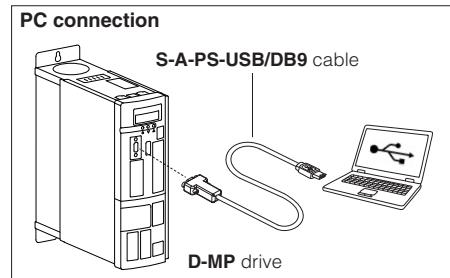

## 3 PROGRAMMING TOOLS

The functional parameters and configurations of the SSP servopumps can be easily set and optimized using the Atos S-SW-SETUP programming software by connecting the PC to the drive via the RS485 serial port.

The software allows the parameterization of the drive via the RS485 serial port even if the drive is connected to the machine central unit via fieldbus.

**S-SW-SETUP** support: NP (Serial)  
BC (CANopen)  
EP (PROFINET)  
BP (PROFIBUS DP)

**Note:** For detailed descriptions of settings, wiring and installation procedures, refer to the user manual included in S-SW-SETUP

## 4 FIELDBUS

Fieldbus allows direct communication between the Drive and the machine control unit for digital reference, extended diagnostics and servopump settings. However, the fieldbus versions allow the servopump to be controlled also through analog references.

## 5 GENERAL CHARACTERISTICS

Installation position	Motor and pump: horizontal position Drive: wall mounting, vertical position
Ambient temperature range	Motor and pump: -20°C ÷ 40°C Drive: -10°C ÷ 50°C motor and drive derate in power for higher temperature
Altitude	up to 2000 m, motor and drive derate in power for higher altitude
Compliance	CE according to EMC directive 2014/30/EU and LVD 2014/35/EU RoHS directive 2011/65/EU as last update by 2015/863/EU

## 6 HYDRAULIC CHARACTERISTICS

Hydraulic fluid	HL, HLP DIN 51524...535, for other fluids contact Atos technical office
Fluid temperature range	-20°C ÷ 80°C
Recommended viscosity	10 ÷ 300 mm²/s - cold start max 2000 mm²/s
Max fluid contamination level	normal operation ISO4406 class 20/18/15 NAS1638 class 9 longer life ISO4406 class 18/16/13 NAS1638 class 7
Min/max inlet pressure	(bar abs) from 0.8 to 2 bar. Recommended ≥ 1

## 7 DRIVE ELECTRICAL CHARACTERISTICS

Rated IN voltage [V]	200 V -10% ÷ 480 V +10% @ 45 ÷ 65 Hz for drive 022 ÷ 060 400 V -10% ÷ 480 V +10% @ 45 ÷ 65 Hz for drive 090 ÷ 210			
DC Bus voltage [V]	280 V -10% ÷ 600 V +10% for drive 022 ÷ 060 280 V -10% ÷ 640 V +10% for drive 090 ÷ 210			
24VDC input power supply	24 Vdc ±10% @ max 1,0 A for drives type 022, 090, 100, 140, 165, 210 24 Vdc ±10% @ max 1,3 A for drive type 032 24 Vdc ±10% @ max 1,8 A for drives type 046, 060			
24VDC output power supply	24 Vdc ±10% @ max 500 mA - only for drives type 090, 100, 140, 165, 210			
Digital inputs	24 Vdc ±10% @ max 10 mA			
Digital outputs	30 Vdc @ max 60 mA			
Analog inputs	±10 V @ max 0,5 mA or 4 ÷ 20 mA (Dip-switch selectable - see user manual)			
Analog outputs	±10 V @ max 2 mA			
Protection degree to DIN EN60529	Motor: IP54 (IP65 on request); Drive: IP20			
Communication interface	Atos ASCII coding	CANopen EN50325-4 + DS408	PROFIBUS DP EN50170-2/IEC61158	EtherCAT, PROFINET IO RT / IRT EC 61158
Communication physical layer	insulated RS485	optical insulated CAN ISO11898	optical insulated RS485	Fast Ethernet, insulated 100 Base TX

## 8 HYDRAULIC OPTION - not for double pump execution

**C** = This option provides a hydraulic block mounted directly on the pump outlet, which integrates a mechanical pressure relief valve with safety function on the maximum system pressure and a pressure transducer for the feedback of the actual pressure on the delivery line.

① Mechanical pressure relief valve; the valve is supplied with zero adjustment, and must be adjusted by the user at a pressure slightly higher than the maximum pressure required by the system.

② Pressure transducer E-ATR-8/400/I - see technical table GS465

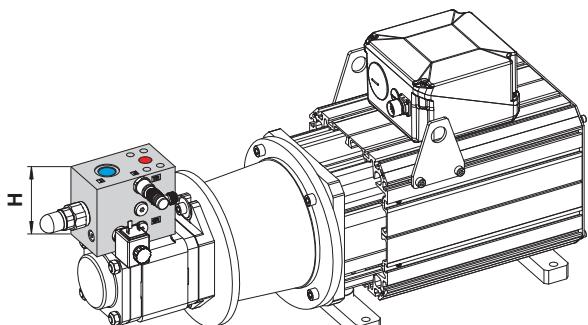

**D** = This option allows to protect the pump from overheating when it is subjected to particularly heavy duty cycles, in particular in the prolonged phases of static pressure control.

This option includes a hydraulic block with relief valve and pressure transducer, as for the /C option, with also integrated:

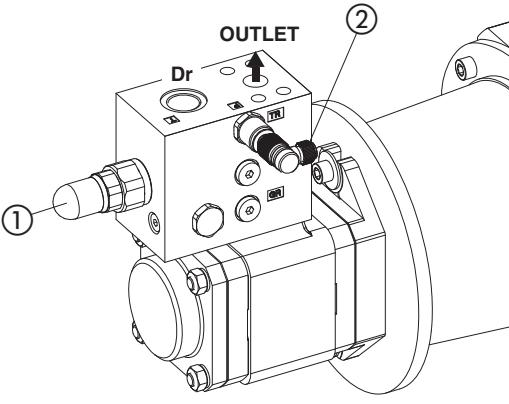

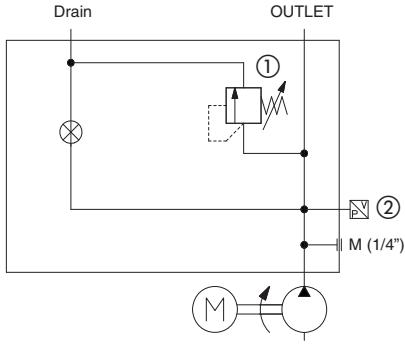

③ Smart Cooling cartridge valve JO-DL-4-2/NC-X 24DC - see technical table E105

When a temperature considered critical is reached, the Smart Cooling valve opens ③ as to cause a small recirculation of oil through the pump which protects it from dangerous overheating.

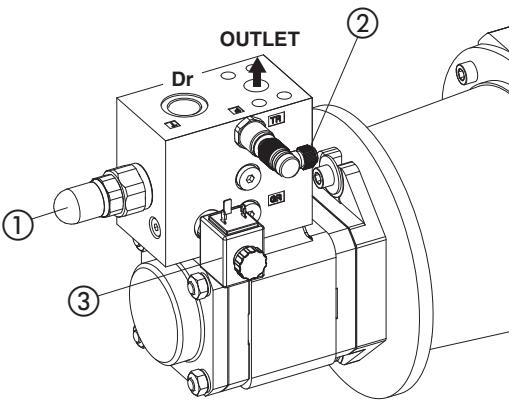

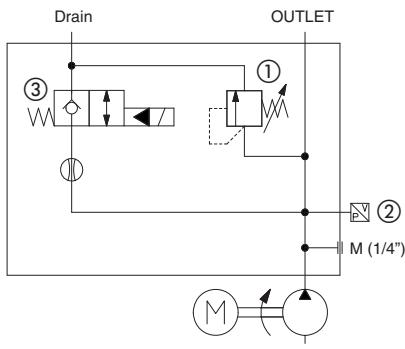

The sizing software for SSP suggests the need for the /D option based on the machine cycle.

Options <b>C</b> and <b>D</b> dimensions	SSP CODE	OUTLET	Dr (drain)	H (mm)
	<b>SSP-T-SP**-1011</b>	1/2" SAE3000	G1/2"	105

Detail option <b>C</b>	Hydraulic scheme option C
	

Detail option <b>D</b>	Hydraulic scheme option D
	

## 9 ELECTRONIC FUNCTION - always present

K = The drive implements the Safe Torque Off (STO) function as a prevention of unexpected starts according to 2006/42/EC Machinery Directive (MD) - standard EN 61800-5-2.

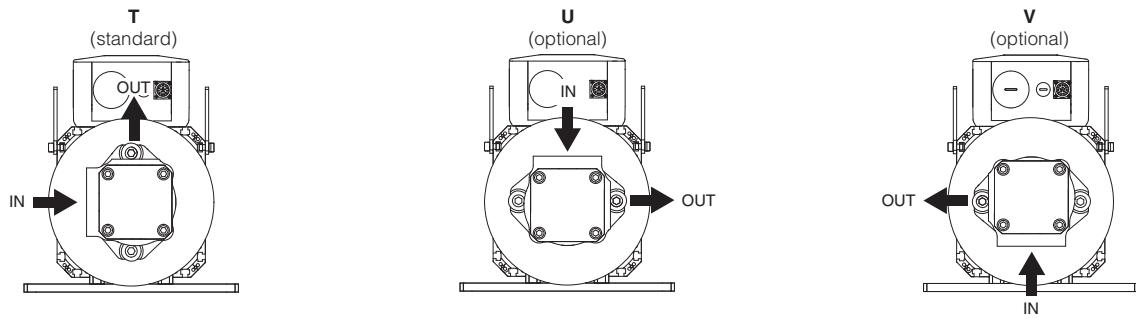

This function prevents the generation of a rotating magnetic field removing the power semiconductor control voltage allowing short-term operations (such as cleaning and / or maintenance work on parts of non-electrical devices of the machine) without disconnecting drive power supply or the connection between the drive and the servomotor.

For detailed descriptions, please refer to the S-MAN-HW installation manual.

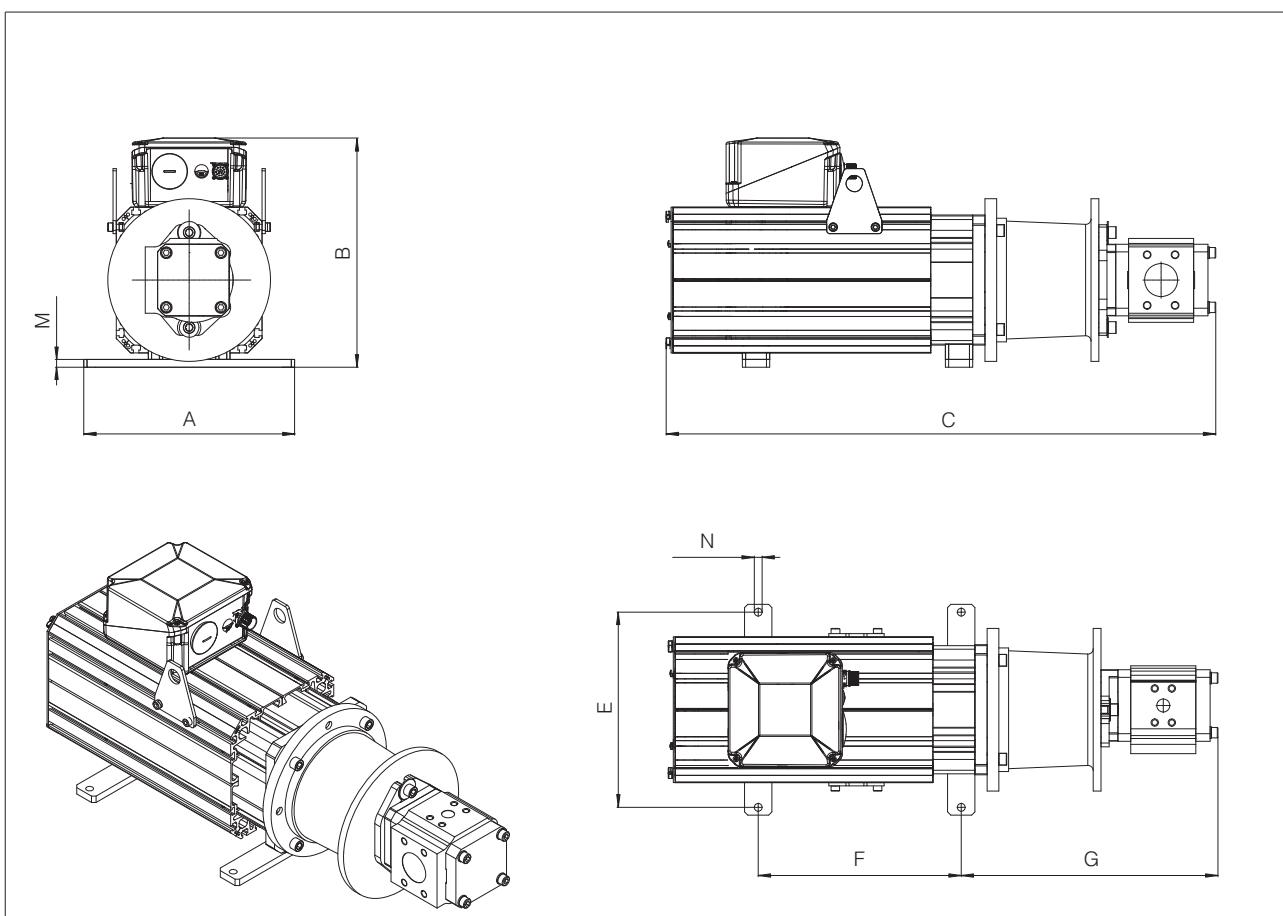

**Possible combined option** - not for double pump execution  
/CK, /DK

## 10 PORTS ORIENTATION

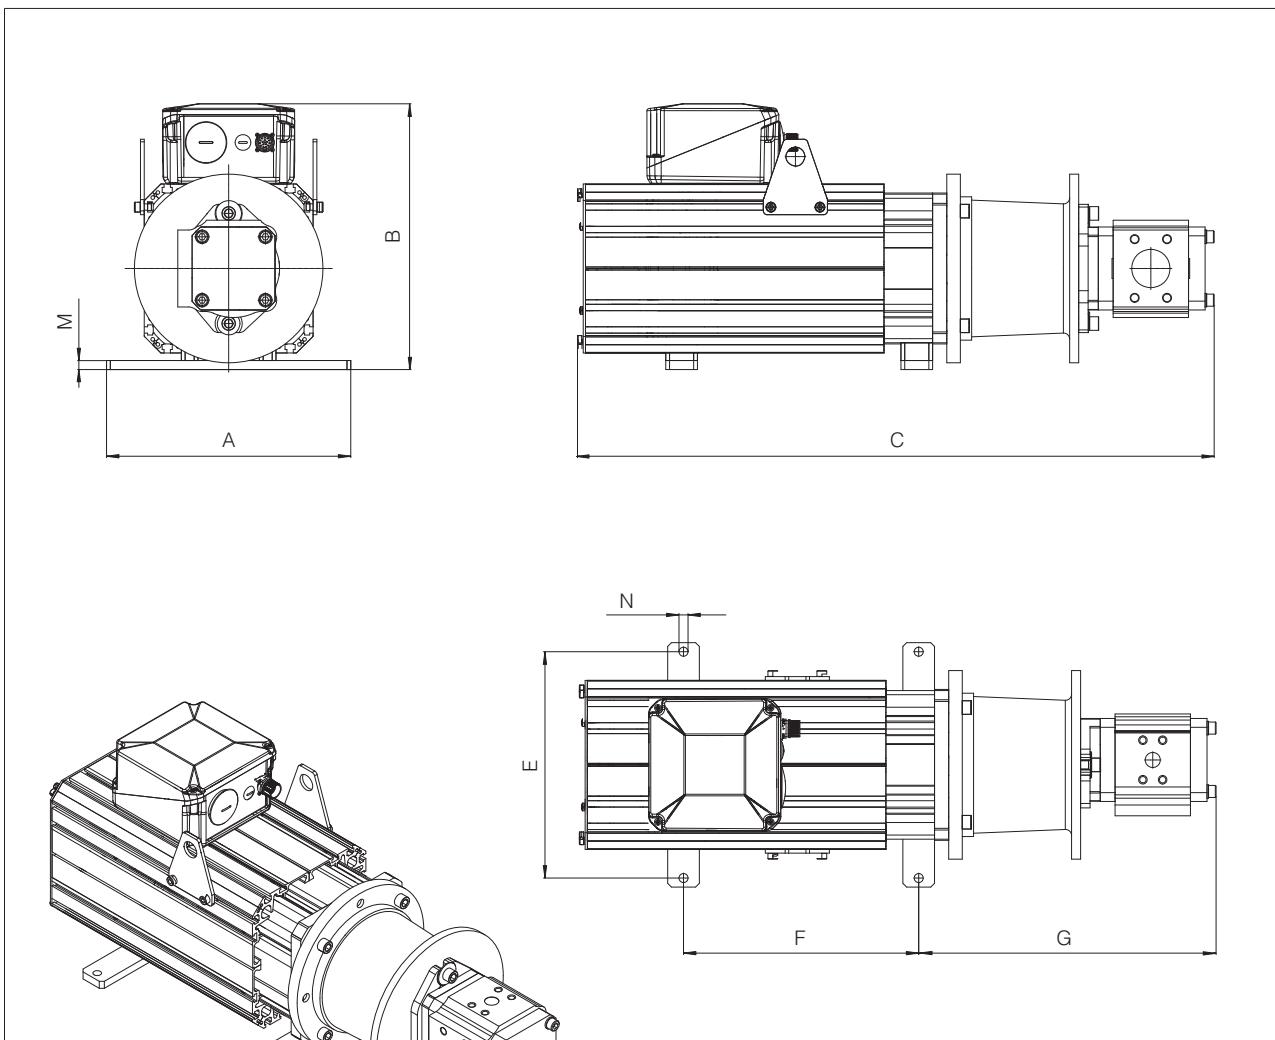

The pump can be supplied with inlet and outlet ports oriented in different configurations, as shown in the figure (seen from the bottom of the pump)

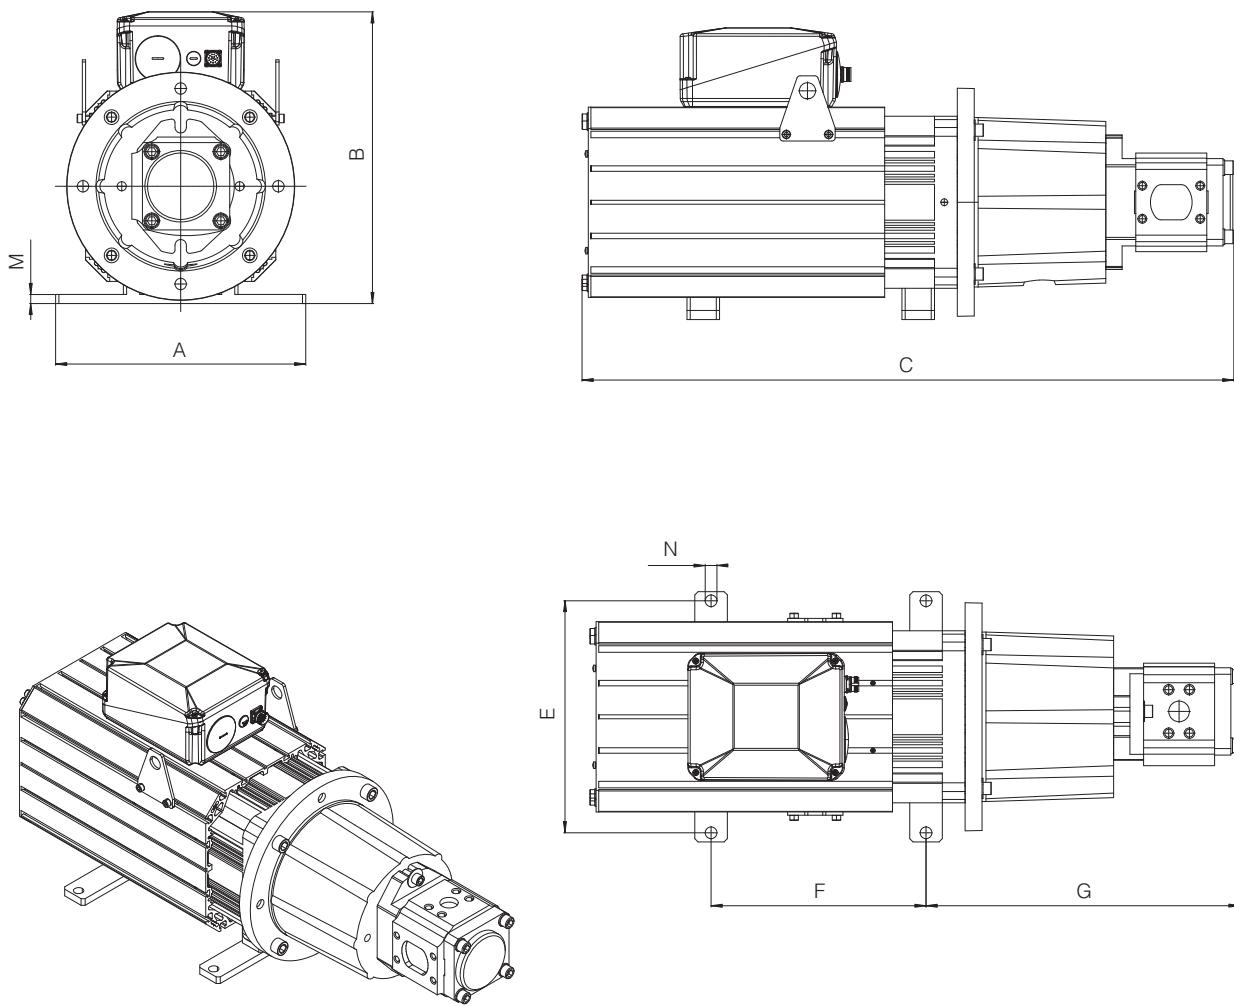

11 INSTALLATION DIMENSIONS - motor pump unit [mm] for drive dimensions see AS500
