

# Ex-proof servoproportional directional valves sleeve execution

direct, with LVDT transducer and zero spool overlap - **ATEX, IECEx, EAC, PESO, CCC** or **cULus**

### DLHZA-T, DLKZA-T

Ex-proof servoproportional directional valves, direct, sleeve execution, with LVDT position transducer and zero spool overlap for best performances in any position closed loop control.

They are equipped with ex-proof proportional solenoids and LVDT transducer certified for safe operations in hazardous environments with potentially explosive atmosphere.

Certifications:

- Multicertification **ATEX, IECEx, EAC, PESO, CCC** for gas group **II 2G** and dust category **II 2D**
- Multicertification **ATEX, IECEx** for gas group **I M2** (mining)
- **cULus** North American certification for gas group **C&D**

The flameproof enclosure of solenoid and transducer, prevents the propagation of accidental internal sparks or fire to the external environment.

The solenoids are also designed to limit the surface temperature within the classified limits.

(1) The valves with Multicertification for Group II are also certified for Indian market according to **PESO** (Petroleum and Explosives Safety Organization)

(2) Only for configuration **40**    (3) Not for multicertification **M** group I (mining)    (4) Possible combined options: /BC, /BY, /CY, /BCY

(5) In standard configuration the solenoid and position transducer are at side of port B    (6) Approved only for the Italian market

## 2 ELECTRONIC DRIVERS

Electronic drivers are factory set with max current limitation for ex-proof valves.

Please include in the driver order also the complete code of the connected ex-proof proportional valve.

|               |                |               |               |

**Note:** above performance data refer to valves coupled with Atos electronic drivers, see section [2](#)

(1) Referred to spool in neutral position and 50°C oil temperature (2) 0-100% step signal

## 5 ELECTRICAL CHARACTERISTICS

|   |   |
|---|---|
| Max. power                                  | 35W   |
| Insulation class                            | H (180°) Due to the occurring surface temperatures of the solenoid coils, the European standards ISO 13732-1 and EN982 must be taken into account |
| Protection degree with relevant cable gland | <b>Multicertification:</b> IP66/67 to DIN EN60529<br><b>UL:</b> raintight enclosure, UL approved  |
| Duty factor                                 | Continuous rating (ED=100%)   |
| Voltage code                                | standard  |
| Coil resistance R at 20°C                   | 3,2 Ω   |
| Max. solenoid current                       | 2,5 A   |

## 6 SEALS AND HYDRAULIC FLUIDS - for other fluids not included in below table, consult our technical office

|                                      |   |  |                      |
|--------------------------------------|---|--|----------------------|
| Seals, recommended fluid temperature | NBR seals (standard) = -20°C ÷ +60°C, with HFC hydraulic fluids = -20°C ÷ +50°C<br>FKM seals (/PE option) = -20°C ÷ +80°C<br>HNBR seals (/BT option) = -40°C ÷ +60°C, with HFC hydraulic fluids = -40°C ÷ +50°C |  |                      |
| Recommended viscosity                | 20 ÷ 100 mm²/s - max allowed range 15 ÷ 380 mm²/s   |  |                      |
| Max fluid contamination level        | normal operation  | ISO4406 class 18/16/13   | NAS1638 class 7      |
|                                      | longer life   | ISO4406 class 16/14/11   | NAS1638 class 5      |
|                                      |   | see also filter section at <a href="http://www.atos.com">www.atos.com</a> or KTF catalog |                      |
| <b>Hydraulic fluid</b>               | <b>Suitable seals type</b>  | <b>Classification</b>  | <b>Ref. Standard</b> |
| Mineral oils                         | NBR, FKM, HNBR  | HL, HLP, HLPD, HVLP, HVLPD   | DIN 51524            |
| Flame resistant without water        | FKM   | HFDU, HFDR   | ISO 12922            |
| Flame resistant with water (1)       | NBR, HNBR   | HFC  |                      |

 The ignition temperature of the hydraulic fluid must be 50°C higher than the max solenoid surface temperature

(1) **Performance limitations in case of flame resistant fluids with water:**

-max operating pressure = 210 bar -max fluid temperature = 50°C

**9 CABLE SPECIFICATION AND TEMPERATURE** - Power supply and grounding cables have to comply with following characteristics:

|   |  |
|---|--|
| <b>Multicertification Group I and Group II</b>  |  |
| <b>Power supply:</b> section of coil connection wires = 2,5 mm <sup>2</sup>   | <b>Grounding:</b> section of internal ground wire = 2,5 mm <sup>2</sup><br>section of external ground wire = 4 mm <sup>2</sup> |
| <b>cULus certification:</b>   |  |
| <ul style="list-style-type: none"> <li>Suitable for use in Class I Division 1, Gas Groups C</li> <li>Armored Marine Shipboard Cable which meets UL 1309</li> <li>Tinned Stranded Copper Conductors</li> <li>Bronze braided armor</li> <li>Overall impervious sheath over the armor</li> </ul> |  |
| Any Listed (UBVZ/UBVZ7) Marine Shipboard Cable rated 300 V min, 15A min. 3C 2,5 mm <sup>2</sup> (14 AWG) having a suitable service temperature range of at least -25°C to +110°C ("BT" Models require a temperature range from -40°C to +110°C)   |  |
| <b>Note 1:</b> For Class I wiring the 3C 1,5 mm <sup>2</sup> AWG 16 cable size is admitted only if a fuse lower than 10 A is connected to the load side of the solenoid wiring.   |  |

**9.1 Cable temperature**

The cable must be suitable for the working temperature as specified in the "safety instructions" delivered with the first supply of the products.

**Multicertification**

| Max ambient temperature [°C] | Temperature class |         | Max surface temperature [°C] |         | Min. cable temperature [°C] |         |
|------------------------------|-------------------|---------|------------------------------|---------|-----------------------------|---------|

| 40 °C                        | -                 | T4      | 150 °C                       | 135 °C  | -                           | 90 °C   |
| 60 °C                        | -                 | -       | 150 °C                       | -       | 110 °C                      | -       |
| 70 °C                        | N.A.              | T3      | N.A.                         | 200 °C  | N.A.                        | 120 °C  |

**cULus certification**

| Max ambient temperature [°C] | Temperature class | Max surface temperature [°C] | Min. cable temperature |
|------------------------------|-------------------|------------------------------|------------------------|
| 55 °C                        | T4                | 135 °C                       | 100 °C                 |
| 70 °C                        | T3                | 200 °C                       | 100 °C                 |

**10 CABLE GLANDS** - only Multicertification

Cable glands with threaded connections GK-1/2", 1/2"NPT or M20x1,5 for standard or armoured cables have to be ordered separately, see tech. table **KX800**

**Note:** a Loctite sealant type 545, should be used on the cable gland entry threads

**11 OPTIONS**

**B** = Solenoid and position transducer at side of port A of the main stage

**C** = Position transducer with current feedback 4÷20 mA, suggested in case of long distance between the electronic driver and the proportional valve

**Y** = External drain, to be selected if the pressure at T port is higher than the max allowed limits

**11.1 Possible combined options:** /BC, /BY, /CY, /BCY

**12 FAIL SAFE POSITION**

| CONFIGURATION  | LINEAR  | NOT LINEAR  |
|--|---|---|
|  <p>fail safe 1</p>       |  <p>t = 7-10 ms (DLHZA)<br/>t = 15-20 ms (DLKZA)</p> |  <p>t = 7-10 ms (DLHZA)<br/>t = 15-20 ms (DLKZA)</p> |
|  <p>fail safe 3</p>       |    |    |
|  <p>without fail safe</p> |    |    |

t = time required by the valve to switch from central to fail safe position at the power switch-off, with pressure 0 to 100 bar

| Fail safe connections                             |             | P → A | P → B | A → T | B → T |
|---|-------------|-------|-------|-------|-------|
| Leakage [cm <sup>3</sup> /min] at P = 100 bar (1) | Fail safe 1 | 50    | 70    | 70    | 50    |
|   | Fail safe 3 | 50    | 70    | -     | -     |
| Flow [l/min] (2)                                  | Fail safe 3 | DLHZA | -     | 15÷30 | 10÷20 |
|   |             | DLKZA | -     | 40÷60 | 25÷40 |

(1) Referred to spool in fail safe position and 50°C oil temperature

(2) Referred to spool in fail safe position at Δp = 35 bar per edge

**13 DIAGRAMS** - based on mineral oil ISO VG 46 at 50 °C

**13.1 Regulation diagrams**

1 = Linear spools L

2 = Differential - linear spool D7

3 = Differential non linear spool DT7

4 = Non linear spool, T5 (only for DLHZA)

5 = Non linear spool, T3 (only for DLKZA) and T7

6 = Progressive spool V

T3, T5 and T7 spool types are specific for fine low flow control in the range from 0 to 60% (T5) and 0 to 40% (T3 and T7) of max spool stroke.

The non linear characteristics of the spool is compensated by the electronic driver, so the final valve regulation is resulting linear respect the reference signal (dotted line).

DT7 has the same characteristic of T7 but it is specific for applications with cylinders with area ratio 1:2

**Note:**

Hydraulic configuration vs. reference signal:

Standard:

Reference signal  $0 \div +10 \text{ V}$  } P → A / B → T

Reference signal  $12 \div 20 \text{ mA}$  }

Reference signal  $0 \div -10 \text{ V}$  } P → B / A → T

Reference signal  $12 \div 4 \text{ mA}$  }

option /B:

Reference signal  $0 \div +10 \text{ V}$  } P → B / A → T

Reference signal  $12 \div 20 \text{ mA}$  }

Reference signal  $0 \div -10 \text{ V}$  } P → A / B → T

Reference signal  $12 \div 4 \text{ mA}$  }

**13.2 Pressure gain**

**14 FASTENING BOLTS AND SEALS**

|   | <b>DLHZA</b>   | <b>DLKZA</b>  |

### DLHZA

ISO 4401: 2005 (see table P005)

Mounting surface: 4401-03-02-0-05

(for /Y surface: 4401-03-03-0-05 without port X)

| Mass [kg] |     |
|-----------|-----|
| DLHZA-T-* | 4,0 |

### DLHZA-T-\*/B

### DLKZA

ISO 4401: 2005 (see table P005)

Mounting surface: 4401-05-04-0-05

(for /Y surface: 4401-05-05-0-05 without port X)

| Mass [kg] |     |
|-----------|-----|
| DLKZA-T-* | 6,1 |

① = Air bleed off
